

Universal Push-to-Connect (UPTC) Assembly

for unprecedented savings, from product design to maintenance

Push.

Click.

Done.

“Push, click, done” literally describes how simple it is to achieve reliable leak-free assemblies with Parker’s UPTC hose and tube assembly. That alone yields direct savings in time, equipment costs, rework and warranties. Unlike other push-to-connect assemblies, it’s also universally compatible.

Parker UPTC delivers:

- Substantial assembly efficiencies – no special tools
- Assured proper connections – with both tactile and visual indicators
- Leak-free performance – rigorously tested and field proven
- Wide-range availability and easy design implementation
- Excellent field serviceability – standard wrench disassembly

And it’s truly “universal” for compatibility worldwide:

- Utilizes standard Seal-Lok™ ORFS or EO fittings
- Suited for inch or metric tube, rubber or thermoplastic hose assemblies

UPTC assembly consists of a standard Seal-Lok™ (ORFS) or EO bite-type fitting, factory-assembled UPTC nut with internal sealing and retaining elements, and hydraulic hose or rigid tube.
